## Annual Energy Outlook 2007 with Projections to 2030

Report #:DOE/EIA-0383(2007)

Release date full report: February 2007

Next release date full report: February 2008

The Annual Energy Outlook 2007 presents a projection and analysis of US energy supply, demand, and prices through 2030. The projections are based on results from the Energy Information Administration's National Energy Modeling System. The *AEO2007* includes the reference case, additional cases examining energy markets, and complete documentation. The report is also released in [print](#).
